

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Previously presented): A hairdryer comprising:

a body having a handle portion and a head portion, said head portion having a blower for generating airflow;

a primary heater for providing heat to said airflow; and

a secondary heater for selectively providing radiant energy to said airflow as desired.

Claim 2 (Original): The hairdryer of claim 1, wherein said handle portion has a control interface.

Claim 3 (Original): The hairdryer of claim 2, wherein said control interface enables an operator to at least activate and/or deactivate said secondary heater.

Claim 4 (Original): The hairdryer of claim 1, wherein said primary heater is a convection heater.

Claim 5 (Original): The hairdryer of claim 1, wherein said secondary heater is an infrared heater.

Claim 6 (Original): The hairdryer of claim 1, wherein said secondary heater is a PTC ceramic heater.

Claim 7 (Original): The hairdryer of claim 1, wherein said primary and said secondary heaters may be operated individually and/or together as desired.

Claim 8 (Original): The hairdryer of claim 1, wherein said secondary heater is self-regulating.

Claim 9 (Original): The hairdryer of claim 1, wherein said head portion has a first end with an air ingress and a second end with an air egress with said secondary heater centrally disposed at said second end.

Claim 10 (Previously presented): A hair styling appliance comprising: a body having at least two portions, a first portion and a second portion, said first portion accommodating at least a primary heating source and a secondary heating source, said second portion accommodating a control interface for allowing an operator to control a heating effect of said primary heating source and/or said secondary heating source.

Claim 11 (Original): The hair styling appliance of claim 10, wherein said primary heating source is one or more convection heaters.

Claim 12 (Original): The hair styling appliance of claim 10, wherein said secondary heating source is one or more infrared heaters.

Claim 13 (Original): The hair styling appliance of claim 10, wherein said secondary heating source is one or more PTC ceramic heaters.

Claim 14 (Original): The hair styling appliance of claim 10, wherein said secondary heating source is self-regulating.

Claim 15 (Original): The hair styling appliance of claim 10, wherein said first portion has a first end with an air ingress and a second end with an air egress, and wherein said secondary heating source is centrally positioned at said second end.

Claim 16 (Original): The hair styling appliance of claim 15, wherein said first portion has a blower for generating an airflow.

Claim 17 (Original): The hair styling appliance of claim 16, wherein said primary heating source initially heats said airflow, and wherein said secondary heating source selectively provides radiant energy thereto.

Claim 18 (Original): The hair styling appliance of claim 16, wherein said blower, or the effect provided thereby to said airflow, is controlled via said control interface.

Claim 19 (Original): The hair styling appliance of claim 16, wherein said blower is adjustable to provide a variety of different airflow effects.

Claim 20 (Original): The hair styling appliance of claim 10, wherein said primary heating source and said secondary heating source are each separately adjustable to provide a variety of different heating effects.

Claim 21 (Previously presented): A hair dryer comprising:

a body having at least a first portion and a second portion, said first portion accommodating at least a primary heating source connected to a power source and a secondary heating source, said second portion accommodating a control interface for allowing an operator to control a heating effect of said primary heating source and/or said secondary heating source, wherein said second heating source is a positive temperature coefficient heater with a doped ceramic, and wherein said positive temperature coefficient heater is connected to said power source.

Claim 22 (New): A hairdryer comprising:

a body having a handle portion and a head portion, said head portion having a blower for generating airflow;

a primary heater for providing heat to said airflow;
and

a secondary heater for selectively providing radiant energy to said airflow as desired, wherein said secondary heater generates an amount of heat exclusive from said primary heater, wherein said secondary heater has a doped

Application Serial No.: 10/757,374
Group Art Unit No.: 3749

ceramic material for providing an electrical conductivity property to said ceramic in said secondary heater when said doped ceramic material is connected to a power supply.

Claim 23 (New): The hairdryer of claim 22, wherein said doped material is a material that is electrically conductive.
